Summary

Ping Pong Ball

[Sports & Outdoor](#) > [Indoor Sports](#)

Tags: [table](#) [ping](#) [tennis](#) [pong](#) [airless](#)

An airless ping pong ball! Seen with some of my other ping pong machinations (<https://makerworld.com/en/models/166872> & <https://makerworld.com/en/models/207809>).

Legal weight is theoretically slightly high (based on design program and slicer filament predictions), but I can't feel a difference (and can't weigh down to 2.7g - the slicer says over 3g)

Plays super well! Hasn't broken yet (like my pickleball which takes a little more abuse - <https://makerworld.com/en/models/232041>)

Is quieter than a normal ping pong ball, but similar feel.

When putting spin on the ball - the flight is fascinating compared to a regular ping pong ball.

V2 (2024_03_07)

Beefed up the thickness and opened up the hexagons/pentagons. More durable and better looking.
