Update 18/12/2022

Added another version with a bigger gap.

Versions:

- 10 and 11mm gaps (original)
- 12 and 13 mm gaps

I really liked the original design by [Shepp 3D](#).

The modifications I made:

- From the original 11.50mm gap on both sides, now each side has a different size to accommodate other phones and added different letters to distinguish, S side 10.50, L side 11.50 (original)
- From the original 9mm hole, increased to 10mm, the phone goes a bit more down and grips better.

Note: Original work may be based on IKEA BERGENES.

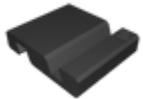

This remix is based on

Phone Stand
