This is a cable organizer for your desk to keep all those running wires organized in this sleek design I made in Audodesk Fusion 360.

This was printed on the Anycubic Kobra 2 Neo Printer!

This design can be printed with PLA or ABS to make the print stronger! I will also be releasing a TPU VERSION to make sure cables never fall down or out of the printed part!

Some tips to make this stronger is to print with more infill and walls!!

Follow me on Thingiverse and Like!!!
