A remix of the honeycomb lamp shade (https://www.thingiverse.com/thing:3175389) resized to a 120mm base diameter. It has an additional surface at the bottom for easier mounting to a wooden base with a lightbulb socket. Alternatively you can print the base with wood or other filament, if you can't buy a wooden one. The lamp shade also has more shallow walls to use less material at this size.

- Snowflakes add-ons: https://www.printables.com/pl/model/328873

Print settings:
There are two versions with different center wall thickness:
• 0.8mm - best for more opaque filaments - should be printed with 0.4mm line width

• 1.0mm - best for more translucent filaments - should be printed with 0.5mm line width

Both should print best at 0.204mm layer height to obtain even spacing in Z.
