Display the symbol of your order with pride, or let all ten orders shine together! These drink coasters are perfectly suited to hold your favorite beverages and protect your table from cup stains.

I modeled these after the coins you can get on Brandon Sanderson's website, and made them such that color changes at the correct layers will make the designs really pop!

I have also created the perfect coaster holder for them as well, in the form of [Urithiru](#).

Let me know if you have any questions or comments, and happy printing!

Print Settings

- Nozzle - 0.4mm
- Layer Height - 0.2mm
- Material – PETG, PLA, or other
- Infill — 15% Honeycomb
- Perimeters – 2
- Top/Bottom Fill Pattern – Octagram Spiral
- **Detect Thin Walls &/or Extra Perimeters - Optional** - Some of the coaster designs may benefit with these settings on or off, please observe the difference within your slicer preview.
- **Perimeter Generator** - Check the difference between **Arachne** & **Classic** for the best desired results
- Ironing – Optional (If you want your coasters to look cleaner, smoother, & more crisp)

Color Change Settings

- Layers 0.0 - 2.2 — Color 1
- Layers 2.4 - 2.6 — Color 2
- Layers 2.8 - 5.0 — Color 3
