### Summary

A Turntablefurniture for my other model, the turntable for dolls. You can use this for anything ofc.

Tags: [dollhouse](#) [doll](#) [dollhousefurniture](#)

EDIT: i also added dxf-files, so you can laser this out of 3mm wood. If you dont have a laser, ignore the dxf-files.

You can print the furniture laying on its back in one go without support, and print the frontpanel to glue into it along with that.

So you have no support-removal-pain.

I want to put the model from cecca\_7 here:

<https://www.printables.com/model/590907-record-cabinet-miniature>

My model is technically not a remix, as i only took the idea from that and didnt scale it up,

but made everything from scratch in Fusion 360 based on the size of my "turntable for dolls".

Thats also why the overall impression is different (in my opinion).

But still i got the idea from there.
