Remix of spaxi's CR-10 Fan Mod with feet.

Because I needed just the feet (for better PSU airflow) I changed the STL to fit my needs.

How is it mounted?

1. Remove the base plate.
2. Unscrew the rubber feet
3. Put the base plate together with a pair of the feet (front and back) on.
4. Screw them gently (eventually you will need washers in order to not crack the plastics).
5. Take the rubber feet and put them in the provided space.
6. Have fun!

### Print instructions

Unassociated tags: Control Box

## Category: 3D Printer Accessories Print Settings

**Printer:** Creality CR-10

**Rafts:** Doesn't Matter

**Supports:** Doesn't Matter

**Resolution:** 0.2

**Infill:** 10%

### Notes:

PLA is perfectly fine
