### Summary

Converts the disk reference point marks between Roland DWX-52 and DWX-53 series dental milling machines.

[Hobby & Makers](#) > [Tools](#)

Tags: [roland](#) [dental](#) [dwx](#)

The Roland DWX-52 series machines reference point for disks is 90 degrees from the reference point on the new DWX-53 series. If you are switching used disks from one machine type to another, use this jig to convert the reference point marks.
