Remix with a few enhancement to fit a 1st gen charging console having a charging compartment door (Tesla Model 3s prior to October 2020 and Model Y 2020 and earlier). Tests well using with a TAPTES aftermarket wireless charger.

Printed in TPU, which I find to be much more luxurious than a hard plastic such as ASA.

Amazing Inland TPU print profile for Bambu X1C is embedded into attached file. If you have Inland TPU and an X1C, use this print profile.
