This is a hybrid of

[Lubricant LM8UU adaptor for Super Synco Lube DE21030 with screw cap](#)  
and [Linear Bearing Greasing Cap for 12g Super Lube Tube](#).

I wanted to screw on the popular 20130 (85gr) adapter/cap on to a 21014 (12gr) tube, because I ordered the wrong tube size...damned!

I've printed the adapter and cap in PLA, with 0,1mm and a .4 nozzle with 15% infill and a brim - nothing fancy.

In order to fit the adapter onto the Super Lube 21014 (12gr) tube you have to cut the upper tip right before the thread - a sharp knife is recommended and be careful with it.

Just out of convenience the cap from [Lubricant LM8UU adaptor for Super Synco Lube DE21030 with screw cap](#) is included in the .3mf file - so this is a one stop download.
