My wife created some custom seat back covers for my 2020 Tesla Model X. These are the new seats with fixed head rests. To keep the covers attached, I 3D printed these small hooks. You can see them in the picture; I slide them onto the edge of the hard plastic part of the seat back, over the stretched cover, and they hold the cover in place very well.

Printed in Prusament Black PETG, 0.3mm layers.

Category: Automotive
