Summary

Small Holder for standard .223 cleaning brushes

[Hobby & Makers](#) > [Organizers](#)

Tags: [223](#) [borebrush](#)

I desinged a small holder for up to 28 bore cleaning brushes for 223 Remington that holds the brushes at a 45° angle and can be screwed down to a workbench.

I printed my testpiece in pla with a wall thickness of 2.4mm and it's was strong enough for me.

However the Model in the files has a wall thickness of 3.2mm.

The holes have a diameter of 5.7mm which fit my bore brushes without any problem.

If you have different ones, or ones for other calibers please let me know and I can upload it.

Printed on the surface with the holes and no need for support then.
