[uv5g](#)

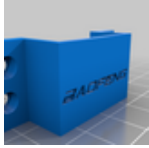

A wall mount for Baofeng UV-5R style radios. Includes a battery charge cable guide for extended battery (BT-5L). I use this in my car with a USB charger cable (BT1013).

The model includes a block to hold 2 antennae: stock short and extended (model NA-771G).

The wall mount results in a snug fit with the radio's belt clip.

I use this as part of my emergency preparedness go-home bag. It facilitates charging when I drive around and is always ready to go.
