Summary

This is an easter egg that comprises of two halves, which can be screwed and unscrewed, making it useful as a container.

This easter egg is made from two halves, that thread together to form a container with storage space. I also made a stand that holds the top (bigger) 'half' of the egg to make it function as a bowl as well. While it isn't big enough to hold reasonable amounts of i.e. snacks (which I recommend against due to the filament not being food-safe), it can function as a cool SD-card holder or to hold any other small items. Made in Fusion 360 fully by me.

Slice with the holes of the eggs being on top
