Summary

Supports my strawberries and protects them from mold since several years now.

I took the [original thing](#) and fused the single parts of the mesh in Blender. It's still not manifold but slices well in Cura and Snapmaker Luban.

Part is available in the original size (support_fraisier_fused_original_60.7mm.stl) and as a shortened version (support_fraisier_fused_30.5mm.stl).

Both parts are in active use and protect my balcony strawberries from moulding!

Thanks to [arnaud roudy](#) for the original design!
