Summary

This is a PCB holder for Andonstar microscope.

[Hobby & Makers](#) > [Tools](#)

The original holder was too small and unstable.

I ordered the arms for this online, I think they should all fit. I added the step files in case anyone has different arms.

I think that any filament is suitable for this, I chose layer height 0.2, so the thread works perfectly.

It is the AndonstarAD249S-P.

have fun with it :-)
