[Hobby & Makers](#) > [Other Ideas](#)

My 2003 Toyota Tundra Access Cab has those windows in the back that don't roll down, but have a clamp that lets you open the back side of the window or clamp it closed. On one side, the arm inside the clamp snapped, making it impossible to keep the window fully open or fully closed. The arm is attached just by simple pressure pins which are easy to remove. So I 3D printed a new arm piece.
