Summary

Compact printbed holder for Prusa printbeds

[3D Printers](#) > [Prusa Parts & Upgrades](#)

Tags: [printbed](#) [bedholder](#) [peisheet](#) [printbedholder](#)

Compact printbed holder that locks in printbeds by using the indent on the bed to its advantage

Can be used to store printbeds inside (Lack) enclosures

Features:

- **Compact**
- **Locks in printbeds**
- **Holds 3 beds**

Print settings:

- **0.2mm layerheight**

No need to change orientation or add supports

Materials:

- PETG
- PLA

Most printer materials will work fine

Hardware:

- Double sided tape (Just to ensure the holder to stay fixed in place)

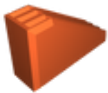

I've not seen any printbed holders that use the shape of the printbed to its advantage.

Mine has been in use for a few years and works just perfect so I thought, let's share it!

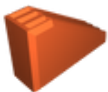

Enjoy!!
