Summary

I keep laser glasses here (diode & fiber) and other things which I need using CAD or LightBurn, etc. Even my phone fits.

Tags: [laser](#) [pens](#) [glasses](#) [rulers](#)

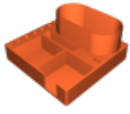

Already made an organiser for my worktop to keep it tidy, but after using for a few months, I decided upon an update.

Holes, for: rulers, pens,, felt tips, marker, sticky notes, micrometer, 12" & 6" rulers (with metric of course), fiber laser FD (focal Distance) gauges, laser glasses and two free compartments for whatever. I keep my phone in one of them, the other I use for this and that and it has a round lip inside so it is easy to remove stuff from it.

Made on Creality K1; Generic PLA; Fill - I used 10%; Brim - any/none; support - none

Fits on 220 x 220 x 250 bed.
