Introducing our 3D-printed **Hot Glue Gun Stand**, designed to accommodate both small and large guns alike.

Featuring a honeycomb-inspired design for a touch of elegance, this stand includes a glue drip tray for mess-free crafting.

Effortlessly blend functionality with style as our hot glue gun stand boasts a sleek honeycomb design. Craft with confidence, knowing your glue gun is securely held in place and your area remains tidy.

I printed it in PLA but you can use PETG or other materials, it requires no supports, it's the perfect accessory for any crafting enthusiast.
