Introducing my **Hex Vase**, with a hexagonal base that gracefully twists upwards, standing at 18cm tall. Versatile for displaying flowers or other decorative items, it exudes elegance and style. Versatile in its use, it's perfect for displaying flowers, foliage, or any other decorative accents, adding a touch of modern elegance to any space.

I used Rock PLA filament with a 0.6mm nozzle, ensuring durability and stability even in vase mode, available profile for 0.4mm nozzle too.
