Summary

G-Scale 1:29 20' Shipping Container Chassis

[Toys & Games](#) > [Other Toys & Games](#)

G-Scale 1:29 20' Shipping Container Chassis, I redesigned the 40' chassis that Manimal designed to fit my 20' shipping container chassis and Manimal's ISO bulk tank! The ISO Tank mounts is so you can put the bulk tank on top of the chassis because the holes won't line up. You can either glue the tank to it or use double sided tape! I used 3/16" aluminum welding rod for the axles but any similar rod will do! The mud flaps I did in two colors in my Prusa slicer so the words will stand out! For the wheels I used GIANTARM Silk Silver filament and a matte black for the tires!

This remix is based on

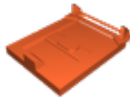

**Container Chassis for your Garden Railroad - USA
Trains 40' Container Compatible**

by Manimal
