Summary

This version of the sword prints-in-place and has a warped square blade.

[Toys & Games](#) > [Other Toys & Games](#)

This is the first version of this sword with a warped square blade, its designed to be printed as one part.

The **replaceable blade version** is available to my Clubs members. Supports are not required, for best results use a .4mm nozzle. Find detailed instructions on how to print collapsing swords on my [website](#). If this is your first time printing, I would suggest you try the **test print** first. If you have issues printing, consider the replaceable blade version. It allows you to print the blades separately in vase mode.

Printed on the **Mulcore** Core-XY 3D Printer
