### Summary

Wall display for the Batarang from Batman Begins.

[Art & Design](#) > [Wall-mounted](#)

Tags: [batarang](#) [sannahed](#)

These are additional parts to display Mathiouze's Batarang model in an IKEA Sannahed frame.

I printed the “straight” model (because that looked the most movie accurate) in 135%, but you can choose any other model or size.

Print the “LED mount” part and use M3 screws to mount it to the back of the IKEA Sannahed frame.

Wrap a LED strip around this part and drill a hole into the back of the frame for the wire.

Use glue to mount the batarang to the LED mount part.

Print the attached SVG label.

Print the “Label frame” part.

Glue the printed label into the printed label frame and then glue it into the Sannahed frame.

I attached all models in Fusion360 and STEP format for easy customization.
