## Summary

Wall mounted for hanging collectible hockey sticks. I designed this to allow for foam to be placed on the inside.

Wall mounted for hanging collectible hockey sticks. I designed this to allow for foam to be placed on the inside. I opted for a single mounting hole to allow the mount to spin to get whatever angle I desired. A stick could be held from a single mount but I chose to use 2 for the sake of getting the angle I wanted on the wall and to know it was going to stay there.

I used Sponge window seal from a big box store to adhere to the inside of the mount to provide a good friction fit and to protect the stick itself.
