**"Mystery"** and carnival masks share an intricate dance of concealment and revelation, weaving a tapestry rich in intrigue and tradition. At the heart of this entwined relationship lies the allure of the unknown, a cornerstone of human curiosity that carnival masks artfully exploit.

Carnival masks, with their origins shrouded in the mists of time and tradition, serve as the perfect vessels for the essence of mystery. They cloak the wearer in anonymity, transforming the mundane into the enigmatic, and in doing so, they invite onlookers into a game of guesswork and imagination. This concealment does more than just hide; it actively engages, compelling us to wonder about the person behind the mask. Who are they? What stories do their hidden faces tell?

The mask is a liminal space, a threshold between the seen and the unseen, the known and the unknown. It's here, in the interstice of mystery, that carnival masks find their true power. They remind us that not all is as it seems, that beneath the surface of everyday life lies a world brimming with potential for transformation and surprise.

Moreover, the mystery of carnival masks echoes the mysteries of life itself. Just as a mask conceals, so do our own faces and words often hide the full truth of our thoughts and feelings. Carnival masks, then, become a metaphor for the complexities of human nature and the depths waiting to be discovered within us all.

In the end, the mystery of carnival masks is a celebration of the unknown, a tribute to the human love for stories, secrets, and the hidden facets of life and self. It's a reminder that behind every mask lies a story, a soul, and a new world waiting to be explored.

**This model is very thin, please take care when removing it from the bed** . Maybe wait until cold.

This is a challenging model to print, so maaaaany thin lines, but the result is

Instead of enabling “**Print Thin Walls**” you can also try with “**Arachne Perimeter Generator**” [https://help.prusa3d.com/article/arachne-perimeter-generator\\_352769](https://help.prusa3d.com/article/arachne-perimeter-generator_352769)

Printing it bigger could help also :P

<b>Nozzle Size</b>	0.4mm
<b>Layer Height</b>	0.2mm
<b>Infill Density</b>	20% or more
<b>Infill Pattern</b>	Cubic
<b>Print Thin Walls</b>	Enabled
<b>Wall Line Count</b>	2 or more
<b>Wall Orientation</b>	Outside To Inside
<b>Supports</b>	NO
<b>Material</b>	PLA or PETG
<b>Print Orientation</b>	STL orientation

If you need to scale the model to fit your print bed, just be sure to **scale in XY and keep Z as 100%** . It needed 2mm height to fit collection stands.

## Notes

Designed to be used with the collection universal stand:
