Hello

Let me present you three new pot designs:

1. **Straight Line Design:** Embodying minimalist chic, this planter features clean, parallel lines etched into its sleek surface. The linear grooves create a subtle yet striking geometric pattern, lending a touch of contemporary flair to your greenery's new home.
2. **Twisty Design:** Like a sculptural ribbon unfurling, this planter's undulating form captivates with its fluid, twisting silhouette. Its organic curves and contoured design bring an air of natural elegance to your indoor oasis.
3. **Wavy Twisty Design:** Making waves with its energetic, rippling texture, this modern planter boasts a mesmerizing pattern of overlapping, wavelike grooves. Its dynamic surface catches the light beautifully,

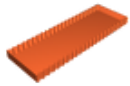

bringing a sense of movement and organic vitality to your potted plants.

Completing the set is a round drip tray and square drip tray for all trio pots, if you scale them down to 50%.

Pots are strong, walls are 2.5mm thick, they will last long time.

No support is require.
