Summary

Two pieces, One is a 14MM by 4MM rod, the other has holes for it to fit through, with sizes incrementally increasing.

[3D Printers](#) > [Test Models](#)

Two pieces, One is a 14MM by 4MM rod, the other has holes for it to fit through, with sizes incrementally increasing.

Each hole is larger than the previous one by 0.2MM, allowing you to test how you should adjust your printer to print two pieces that are supposed to fit together.

The model should use very little filament, considering the small size of the build.
