Summary

A mount for the Ultimate Camera Mount, so the camera is mounted upright.

A mount for the Ultimate Camera Mount, so the camera not necessary rotated 180 degree.

The original mount is great but in order to keep the camera working for Creality Print and Homebridge, I need to keep the camera upright.

Update 20240404

- Added v2
 - Minimal vertical length (Camera can get as high as possible under the arm)
 - Lossen a bit
