Summary

Covers for eurolock barrels exist, but this fits anti-drill shields to keep sand and rain out

Tags: [parametric](#) [magnetic](#) [openscad](#) [eurolock](#)

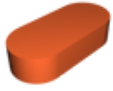

We have a lockable container with eurolock barrels, but sand gets into the keyholes.

Covers for standard eurolock barrels exist, however these lock barrels are larger with cast iron anti-drill shields.

This is a parametrised openSCAD design which can be easily customised for your lock size, and is held on by two small cylindrical magnets (also customisable).
