I crafted an adapter for the DIVEVOLK SeaTouch 4 Max housing, sculpted based on an older iPhone reference, to specifically accommodate the Samsung S24 Ultra.

This initiative arose from a friend's requirement for such an adapter for their diving pursuits, given the challenge of sourcing one locally. Through meticulous adjustments and sculpting, I successfully tailored the adapter to seamlessly fit the dimensions of the S24 Ultra.

Still having issues with the first layer right above the supports, so if anyone has any tips on how to improve this, I'm all ears.

Good divings, stay safe.
