updated 2. 4. 2024 | published 2. 4. 2024

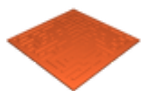

### Summary

Don't get lost when having a drink :) Best printed with thick walls (2.4mm) to avoid infill. Changing colour works.

[Household](#) > [Living Room](#)

Created by extruding a graphic of a maze I created. Thick walls work best to prevent infill patterns. May want to change filament colour when the flat area ends. I printed in PETG so if you spill your drink won't stain.
