Summary

These are some simple and strong plugs to keep things in your doors.

[Hobby & Makers](#) > [Automotive](#)

These are some simple and strong plugs to keep things in your doors. These should only be printed in high-temperature materials like ASA and ABS.

I use Polymaker ASA for the main body on mine: <https://amzn.to/3vAChPM>

Rather just buy some? Get them here: <https://kirkmakesthings.etsy.com/listing/1692993822/honda-element-door-plugs>
