### Summary

A handy way to mount your Hakko to a Multiboard.

[Hobby & Makers](#) > [Tools](#)

Tags: [hakko](#) [multiboard](#) [multiconnect](#)

If you use the Multiboard system and have a Hakko Soldering Iron, this is a must have.

Hang your Hakko on your Multiboard using the Multiconnect system (<https://www.printables.com/model/716558-multiconnect-generic-connector-for-your-board>)

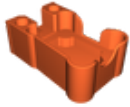

This unit simply slides on to 4 of the multiconnect connectors. Very strong and secure.
