Summary

This is a simple Kansas City Current magnet with correct logo. Magnet holes in the back are 6mm.

I wanted something Kansas City Current with all the hype and new stadium here in town so I made this. This isn't the exact colors but close enough for my use. There are magnet holes in the back that are 6mm.

I also included a sign version that doesn't have magnet holes and has little holes to hang it by a string or can nail/screw it in if you want.
