Summary

When the mud gets deep it is an essential

[Tabletop Miniatures](#) > [Vehicles & Machines](#)

There are not many snorkels for our beloved Landy Mini. I found this great model by [atelierhemi](#), that I adapted to be glued to the body. I tilted the snorkel slightly to tightly fit the body. For printing I suggest to cut it in two, e.g. as in the .3mf file. You still need some supports for the face that gets glued.

I used a 0.25mm nozzle for fine detail, but a 0.4mm nozzle should work just as well.
