Summary

Filament guide with rotating ball for Prusa printer

[3D Printers](#) > [Prusa Parts & Upgrades](#)

Tags: [filament](#) [ball](#) [guide](#) [ptfe](#)

This is the filament guide to place into hexagon hole on top of Prusa printer with a rotating ball inside. It is possible to put a 4 mm PTFE tube inside. You can use it with or without it.

I printed it from PETG with a 0.1 mm layer.
