### Summary

Little helper to mount the dust seals on your ATE 60 caliper

When you're overhauling your ATE 60 calipers you come across a big problem while trying to mount the dust seal - it's impossible without a special tool.

I got it from VW and measured it and designed 2 versions of it. One like the original (like the drawing), one a bit optimized for 3D printing.

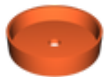

You should print it with a high amount of infill and perimeters.

I used the VW tool for the design, but it should work on some other cars too which use ATE 60 calipers.
