## Summary

Workstation board with secure slots for Adafruit DragonTail, breadboard, and Micro:Bit battery pack.

[Hobby & Makers](#) > [Electronics](#)

Tags: [education](#) [microbit](#)

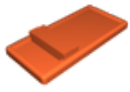

I have developed a workstation board designed to securely attach a small breadboard and the Adafruit DragonTail adapter for Micro:Bit. This design ensures streamlined distribution to students for engaging, hands-on Micro:Bit activities. Furthermore, the board features a specifically engineered slot to accommodate the Micro:Bit AAA battery housing pack beneath it. For enhanced stability, there is also the option to secure both the DragonTail and the small breadboard with self-adhesive tape.

### List of Materials Used:

[Adafruit DragonTail](#)  
[Half-Size Breadboard](#)  
[Micro:Bit v2 Club Bundle](#)  
[Self-Adhesive Tape](#)

Printed in PETG without supports, set 25% Honeycomb Infill.
