This is a remix of the dragon scale pot. The improvements include:

- More watertight and stable walls
- A removeable water catchment area that blends seamlessly with the rest of the pot
- Two alignment pegs to connect the catchment and pot
- A hole in the bottom of the pot to connect to the water catchment

Assembly:

1. Secure the pot on top of the catchment (line up the hole in the bottom with the two alignment pegs)

2. Add a mesh, fabric or small stone above the hole to allow water (but not dirt) to go in the catchment
3. Place your dirt, plant, seeds, or something else in the pot.
