Made a bottle holder that is 85mm wide for Rostaps HSW with optional add on spraybottle dispenser thingy whatever you wanna call it that about 15mm wide. Print the big holder stadning up wiht support from buildlate only (organic is to prefer). Thats just the thiny amount for the top most attachment fro the HSW. The timy adapter slides on from top and "clicks" on, but print this one upside down. The hold should fit a 15 mm mini spraybottle, I reused mine from a screen protector application, works great.

This and a micro fiber cloth for the bed to clean it saves alot of IPA and paper towel!

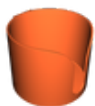

This remix is based on

Honeycomb storage wall
