Summary

Solar filters for the Orion 15x70 binoculars

[Learning](#) > [Physics & Astronomy](#)

Tags: [filter](#) [solar](#) [binoculars](#)

For these binoculars: <https://www.amazon.com/dp/B004GX094Y>
with these solar filters: <https://www.amazon.com/dp/B0CX62H9B2>
All pieces are oriented how they should be printed, no supports required.
With the linked solar filters I was able to superglue both inner rings onto it, and roughly cut the filter around the ring. After it set, I superglued the outer ring to the inner ring.
Ensure the shiny side of the filter will be facing the sun!
