This is a cupcake Christmas tree ornament! Print the cupcake tin in vase mode so that it will slot into the bottom of the frosting. Print the frosting and cherry at a smaller layer height for better curved surfaces. Assemble the parts hread a ribbon through the hole to make an ornament you can hang on your tree.

If you just want a 3D printed cupcake (not a tree ornament) you can glue the pieces together and fill the hole in the cherry with a "stem" made out of filament. A 3D pen is great for this!

Print Settings

Printer Brand:

Crealitiy

Printer:

CR-10S

Rafts:

No

Supports:

No

Resolution:

0.16

Infill:

10

Filament: Proto-Pasta PLA Multi
