Sorry, I just want to make sure people follow the licenses :)

This is a clip that keeps the cover on the Microsoft Surface closed, instead of just that little flimsy rubber tie over the corner. Print in PETG or stronger because it warps over pressure and stress of being forced open, holding the cover closed.

Made in Tinkercad

Print Settings

Printer Brand:

Prusa

Printer:

i3 MK3 MMU 2

Rafts:

No

Supports:

No

Resolution:

15mm SPEED

Infill:

100%

Filament: Overture PETG Black

Notes:

Print in PETG or stronger because it warps over pressure and stress of being forced open, holding the cover closed.
