Simply push this block into the braille 6mm cell to reset it. You may need to sand some of the sides down for it to work effectively, or print it at 99% scale. I designed this to help people learning braille that are visually impaired, because they may not be able to reset all of the pins easily

By the way, this model is licensed under Creative Commons: Public Domain. This means you can use it at work, school, sell it, share it, whatever! =D

If you print this, please let me know what settings you used and how it went by posting a Make. Thanks!
