Summary

A quick fix for your broken or missing zipper slider, using the toughness of a cable tie.

[Household](#) > [Other House Equipment](#)

Tags: [slider](#) [pull](#) [latch](#) [zipper](#) [reissverschluss](#)

Print is very quick, it can be a tight fit. Maybe its enough just to friction fit the parts together. I used a little glue. Maybe you also need some sanding.

My cable tie is 4.5 mm thick. The head of the cable tie is 7.5 x 7.5 mm at its thickest.

Feel free to modify the Fusion design to your needs.
