I created a wall mount for the Honor Pad 9. Read print settings to guarantee a good fit.

If your printer is large enough you can print:

- top_bracket
- bottom_mount

or otherwise use the pre cut parts:

- top_bracket_cut
- bottom_mount_cut

Honor Pad 9 (Affiliate): [Aliexpress](#)

Print Settings

Printer Brand:

Anycubic

Printer:

Vyper

Rafts:

No

Supports:

Yes

Resolution:

0.2

Infill:

15%

Filament: **PLA or PETG**

Notes:

- Use supports on the curvatures and floating segments.
- The mounting holes dont need supports.
- Print on charging port side instead of layed flat. This prevents the need for support in the gap and decreases the chances of the tablet not fitting .
