updated 3. 4. 2024 | published 3. 4. 2024

Summary

A remix of TUSH so that I could use the hardware I had on hand.

[3D Printers](#) > [Voron Parts & Upgrades](#)

I had a TON of 690zz ball bearings, unfortunately almost every model out there is using 608zz so I had to do it myself.

This remix is based on

TUSH - The Ultimate Spool Holder

by filamentry

Model files

spool_roller_690zz_v3.stl
