I modeled this shield after the the dimensions of the motherboard. It fits perfectly on the board and in the case. It is a bit bigger on the ports opening than the original metal one but it still looks nice and quality. I have made it after the X470 Gaming Pro Carbon AC. There is a version for the one without wifi also.

If you decide to print it use something more heat resistant like ABS/ASA.

Printed on a Bambulab P1S with ASA at 0.24 height
