Tags: [wall](#) [holder](#) [mount](#) [screw](#) [key](#) [audi](#)

This is an Audi style key holder for wall mounting. You have the option of reinforcing the individual holders with M3x20 screws so that nothing can break.

Both versions can be printed without supports.

For the version with screws, a small layer has to be pierced with a screw. This layer was added to allow the model to be printed without supports.

To get the "Audi" lettering on top of the holders, try changing the layer in the middle of the print. This will also give you the opportunity to hide the hooks for hanging in the same colour as the wall.
